

# LoD - Mini Project 1

Aim To provide a user with suggested cryptocurrencies to invest in, develop a portfolio / automate portfolio generation.

CryptoPort / Cryptfolio etc. (working names)

## Requirements

- o Allow user to delegate risk ration, conservative: High risk
- o Provide a list of stocks & suggested purchase amount of each,
- o give list and allow user to swap suggestions with list manually
- o allow user to simply build their own portfolio using a search crypto function / functionality.
